For this project the postal code of Toronto will be fetched from the Wikipedia page. data will be retrieved to get the boroughs.
https://en.wikipedia.org/wiki/List_of_postal_codes_of_Canada:_M

This will provide the data for each borough and then the neighborhood.

Foursquare API will be used to get the categories of the type of things present in the borough and neighborhood like pubs, restaurants etc.

A Foursquare API Call is like the following:
'
